DO YOU WANT PATIENT START & PROGRESS PAGES OF PHOTOS & X-RAYS?

VECTOR III® INTERACTIVE SPRING SYSTEM

PAT. #5,984,675

Custom ordered for an individual patient. Customary fee \$300. Estimated 5-12 weeks with the springs interacting with the primary appliances (braces). Expected treatment time reduction of 6 months or more.

VECTOR III®, with its **BioAnalytic™** mechanics, accomplishes five universal orthodontic objectives better than any other bio-mechanical device, IE;

1. Moves teeth faster.
2. Moves teeth with less discomfort.
3. Moves teeth with less potential root damage.
4. Controls the **ROOTS & CROWNS** while moving teeth differentially in 3 planes in space simultaneously, providing enhanced retention stability.
5. Defers the decision and significantly reduces the need for permanent tooth extraction in the most common indication, severely malposed teeth. The decision to extract teeth or not, can be deferred 5-12 weeks with the **VECTOR III® SPRING SYSTEM** as a custom option. Unlike conventional orthodontic treatment **VECTOR III®** controls the **ROOTS AND THE CROWNS**. The concern of "round-tripping" the teeth (forward & back again) with the net result of the roots being forward farther than before treatment is no longer a concern with **VECTOR III®**.
By deferring the decision to extract permanent teeth for 5-12 weeks, the evaluation of the facial profile, tooth alignment and arch form, can be made by the patient, parents and doctor without a chance for error or compromise.

HOW TO ORDER **VECTOR III®**

1. Fill out order form and place on copy machine.
2. Place study models teeth down on copy machine (next to order form). It is not necessary to have trimmed models.
3. Place 8 1/2" x 11" white paper over the models and make a copy.
4. Fax or mail order to **VECTOR III®**.

The usual time to receive your custom patient packet is one week, however it will sometimes take longer due to mail delays.

If you have any questions please feel free to call us at 262-763-5023 or fax us at 262-763-5737
